

Product Data Sheet

Anti-Rabbit Poly-HRP IHC Reagent

Catalog number : IHC-2281-15, IHC-2281-50, IHC-2281-C

Product Description

This ready-to-use Poly-HRP conjugate reagent is designed for use in immunohistochemistry procedure. It should be used with rabbit primary antibodies. Prepared in HRP conjugate diluent, the concentration of Poly-HRP conjugate has been optimized for best detection performance. With stable HRP enzyme activity, this anti-rabbit IgG Poly-HRP conjugate reagent offers convenience, consistency and reliable detection performance.

<u>Cat. No. IHC-2281-15:</u>	15 ml
<u>Cat. No. IHC-2281-60:</u>	60 ml
<u>Cat. No. IHC-2281-C:</u>	bulk qty.

Applications

Immunohistochemistry
ELISA
Western Blotting

Product Use

The HRP conjugate concentration has been optimized as ready-to-use reagent for optimal detection performance.

Intended Use

For Research Use or Manufacturing Purpose Only

Analysis and Test

The quality of this product is assured via IHC test

Storage and Stability

Store at 2-8 °C, stable for at least 12 months from the date received.
